

There is more concern about media concentration than the FCC realizes. Most anyone I personally know is forced to rely on the internet to access independent media and news services because of this concentration. We should not be forced to look to other countries (ie BBC/the guardian) for an unbiased or even differing opinion regarding domestic issues. We are supposedly guaranteed a free press, yet huge corporations with their own agendas control our news. They are not fair and objective, it's not in their interest to be; money controls all. Please act in the best interest of this country and let the citizens of this country take back the airwaves that rightfully belong to us. Our media resembles that of a totalitarian state and we have become a plutocracy. We need independent media and less monopolies in this country. The state of the media today would have never permitted any of the sweeping changes this country has seen in its short history. The great movements in this country began out of dissent and alternative views. If this country is ever going to survive and prove that our great experiment in democracy can work, we need to allow our press to be free and take back our air-waves. Please do not take this review lightly, we do care.
